Journal of Automated Reasoning (2006) 36 © Springer 2007

Contents to Volume 36

Volume 36 Nos. 1–2 2006

Special Issue on

Automated Reasoning for Security Protocol Analysis

Guest edited by Allessandro Armando, David Basin, Jorge Cuellar, Michaël Rusinowitch and Luca Vigano

ALLESSANDRO ARMANDO, DAVID BASIN, JORGE CUELLAR, MICHAËL RUSINOWITCH and LUCA VIGANÒ / Automated Reasoning for Security Protocol Analysis 1–3

GIAMPAOLO BELLA, FABIO MASSACCI and LAWRENCE C. PAULSON / Verifying the SET Purchase Protocols 5–37

ROHIT CHADHA, STEVE KREMER and ANDRE SCEDROV / Formal Analysis of Multiparty Contract Signing 39–83

STÉPHANIE DELAUNE and FLORENT JACQUEMARD / Decision Procedures for the Security of Protocols with Probabilistic Encryption against Offline Dictionary Attacks 85–124

HANS HÜTTEL and JIŘÍSRBA / Decidability Issues for Extended Ping-Pong Protocols 125–147

GRAHAM STEEL and ALAN BUNDY / Attacking Group Protocols by Refuting Incorrect Inductive Conjectures 149–176

Volume 36 No. 3 2006

GILLES AUDEMARD, BELAÏD BENHAMOU and LAURENT HENOCQUE / Predicting and Detecting Symmetries in FOL Finite Model Search 177–212

VIKTOR KUNCAK, HUU HAI NGUYEN and MARTIN RINARD / Deciding Boolean Algebra with Presburger Arithmetic 213–239

NICK C. FIALA and KEITH M. AGRE / Searching for Shortest Single Axioms for Groups of Exponent 6 241–257

CARLOS SIMPSON / Explaining Gabriel–Zisman Localization to the Computer 259–285

Volume 36 No. 4 2006

Special Issue on

Empirically Successful Automated Reasoning: Systems Issue

Guest edited by Bernd Fischer, Geoff Sutcliffe and Stephan Schulz

BERND FISCHER, GEOFF SUTCLIFFE and STEPHAN SCHULZ / Empirically Successful Automated Reasoning: Systems Issue 287

BERND LÖCHNER / Things to Know When Implementing KBO 289–310

MICHAEL BEESON / Mathematical Induction in Otter-Lambda 311–344

ENRICO GIUNCHIGLIA, YULIYA LIERLER and MARCO MARATEA / Answer Set Programming Based on Propositional Satisfiability 345–377

ANDREW IRELAND, BILL J. ELLIS, ANDREW COOK, RODERICK CHAPMAN and JANET BARNES / An Integrated Approach to High Integrity Software Verification 379–410
